Robinhood Product Features Disclosures

Top Movers Feature

Robinhood uses a proprietary algorithm to select stocks with the largest price movements from a Robinhood user’s portfolio, watchlist, and the S&P 500.

Top News Feature

Top News filters news sources on Stocks, Exchanges, and Markets. Robinhood uses a variety of news APIs pull news and news sources.

Watchlist

Your watchlist may be pre-populated with sample symbols to demonstrate the functionality of the Robinhood application. The symbols listed are the 15 most purchased stocks on Robinhood (excluding leveraged securities), calculated using the total number of buy orders on Robinhood from 12/15/2014 to 10/29/2015. You can add other symbols and remove any symbols from your watchlist. The symbols are meant for informational purposes only and not intended to serve as a recommendation to buy or sell any security in your Robinhood account.

Disclosure:

The Robinhood product features listed above are meant for informational purposes only and are not intended to serve as a recommendation to a customer to buy or sell any security in their self directed Robinhood account, or any other account. Third party information provided for Robinhood product features do not reflect the views of Robinhood Markets Inc., Robinhood Financial, LLC, or any of their subsidiaries or affiliates.

All investments involve risk and the past performance of a security or financial product does not guarantee future results or returns. Keep in mind that while diversification may help spread risk it does not assure a profit, or protect against loss, in a down market. There is always the potential of losing money when you invest in securities, or other financial products. Investors should consider their investment objectives and risks carefully before investing.
