\$50,000,000+	4.70%		
Restricted Accounts	\$0		
Worthless Securities Processing	\$0		
Voluntary Corporate Action/Election	\$0		

Robinhood reserves the right to vary its rates and fees. All fees are denominated in U.S. dollars (\$). The latest GBP/USD exchange rate (Bank of England) can be found [here](#). On 2 January 2025 this rate was 1.24, meaning that the value of \$1 was equivalent to approximately £0.81

ⁱ The published fees are effective 14 May 2025. Visit our [Help Centre](#) to learn more.

ⁱⁱ Fees effective 1 January 2024. The limit on this fee is based on execution of your order, which can occur in parts. This fee is rounded up to the nearest penny and no greater than \$8.30 (unless the fee is less than one cent, in which case it is rounded down to 0).

ⁱⁱⁱ The Options Regulatory Fee ("ORF") is a transaction fee that U.S. options exchanges assess their members in connection with options transactions. The ORF is collected by the Options Clearing Corp ("OCC") on behalf of the exchanges. The ORF varies by options exchange, where an options trade executes, and whether the broker responsible for the trade is a member of a particular exchange. As a result, Robinhood calculates an average blended rate based on the amount it is required to remit to the exchanges. The fee charged by Robinhood may differ from or exceed the actual fee paid by Robinhood in connection with any transaction. These differences may be caused by various factors, including, among other things, the rounding methodology used by Robinhood, the use of allocation accounts and transactions or settlement movements for which a fee may not be assessed, timing differences in fee changes, third-party rate caps and floors, calculation errors and various other anomalous reasons. You acknowledge, understand, and agree that Robinhood determines the amount of the ORF charged to you and its other customers in its sole and exclusive discretion, and that the ORF amount collected from you by Robinhood may differ from or exceed the ORF that Robinhood pays to OCC. The OCC Clearing Fee is charged by the OCC who provides central counterparty clearing and settlement services to the US options exchanges. The purpose of the OCC Clearing Fee is to recover a portion of the costs related to the OCC's supervision and regulation of the options markets.

^{iv} The Consolidated Audit Trail ("CAT") Fee is a charge assessed to industry members, such as broker-dealers like Robinhood, to fund the operational costs of the CAT system. The CAT system is a regulatory initiative mandated by the US Securities and Exchange Commission (SEC) to create a comprehensive audit trail of all equity and options trades in the U.S. markets.

This fee is rounded to the nearest penny (unless the fee is less than one cent, in which case it is rounded down to 0). The CAT Fee prior to 1 July 2025 was: \$0.0035 per contract for options, \$0.000046 for NMS equities, \$0.00000046 for OTC equities.

^v NMS ("National Market System") stocks are securities that are listed on US national exchanges, such as the New York Stock Exchange (NYSE) and Nasdaq.

^{vi} Customers may use margin in connection with certain transactions such as trading on unsettled funds. Robinhood does not charge fees in connection with such incidental use of margin in an account.

^{vii} Margin rates shown are as of December 19, 2024. Robinhood charges a margin interest rate that varies depending on your settled margin balance and the upper bound of the Target Federal Funds Rate, which is set by the Federal Reserve and is subject to change without notice. The formulas used to calculate the margin interest rate are subject to change at Robinhood's discretion. These margin interest rates might change at any time without notice and at Robinhood's discretion.

Robinhood U.K. Ltd (Robinhood UK) is a company registered in England and Wales (09908051). It is authorised and regulated by the Financial Conduct Authority (FRN: 823590). Robinhood UK onboards UK customers and has the lead customer relationship with UK customers in relation to their use of the Robinhood UK app and website.
