

Custom Indicators and Scans Disclosure

Custom Indicators (“Indicators”) and **Custom Scans (“Scans”)** are generated using proprietary and/or third-party generative artificial intelligence (AI) models to assist with technical analysis and market scan generation.

Indicators and Scans are provided for informational purposes only. They should not be viewed as investment advice, a recommendation to buy, sell, or hold any security or asset, or an endorsement of any trading strategy or product by Robinhood. The output of Indicators and Scans is not research and does not provide you with the requisite information needed to make an investment decision.

In addition to any restrictions set forth in Robinhood’s [Terms and Conditions](#), you will solely ensure that: (a) Inputs do not contain or make use of, and otherwise could not reasonably be expected to generate Outputs that contain or make use of: (i) any personal data; or (ii) content that would violate the rights of others or has otherwise been unlawfully obtained; and (b) you comply with any submission guidelines or other policies we may make available to you that apply to your use of an AI Tool or submission of Inputs

Custom Indicators

- Indicators allow users to generate customized technical indicators by describing their desired functionality (e.g., "show Golden Crossovers") which the AI then converts into code and plots on a chart.
- Indicators are based on the user's input and available data. Robinhood does not guarantee the accuracy, completeness, or reliability of the code generated or the signals/plots displayed.
- The use of AI to generate code introduces inherent risks, including the potential for the AI to produce incorrect, inefficient, or flawed code that may lead to inaccurate analysis or signals.

Custom Scans

- Scans allow users to discover tradeable symbols (such as stocks, ETFs, and crypto) that match specific criteria defined by the user.
- Scans surface symbols based on the availability and accuracy of market data. Data availability varies by asset type.
- Scans do not filter for suitability or appropriateness for any specific investor's portfolio or risk tolerance; they merely match technical criteria.

General Disclosures

- **No Guarantee of Performance:** Indicators and Scans are based on historical data and technical patterns. Past performance is not indicative of future results, and the use of Indicators and Scans does not guarantee investment success or prevent losses.

- **User Diligence Required:** Information and signals provided by Indicators and Scans should not replace your own independent investment diligence process. You should not buy or sell any security or asset without first determining that it is appropriate for your portfolio and investment strategy.
- **Data and Time Constraints:** Indicators and Scans rely on market data which may be delayed, incomplete, or inaccurate. Robinhood does not guarantee the timeliness, accuracy, or completeness of any data used by Indicators and Scans.
- **Limited Availability:** Indicators and Scans may not be available for every company, security, or asset, and the availability of data fields and features may change over time.
- **Trading Hours Warning:** When viewing results outside of regular market hours (9:30 AM–4:00 PM ET), please be aware that the symbols displayed may not be tradable until the next regular session, and not all securities are eligible for trading during the Extended Hours Trading or 24 Hour Market sessions.

Custom Indicators and Custom Scans for securities are provided by Robinhood Financial LLC, and those for cryptocurrencies are provided by Robinhood Crypto, LLC.

Use Notice

The text input fields for Indicators and Scans are strictly for technical requests related to their functionality.

Do not use this input area to submit formal customer complaints, regulatory feedback, or other compliance-related issues. For all official complaints or concerns, please use our designated support channels to ensure your issue is properly logged and addressed.
