Robinhood Web Disclosures

The Robinhood product features provided through www.robinhood.com are meant for informational purposes only and are not intended to serve as a recommendation to a customer to buy or sell any security in their self-directed Robinhood account, or any other account. Third-party information provided for Robinhood product features do not reflect the views of Robinhood Markets, Inc., Robinhood Financial LLC, or any of their subsidiaries or affiliates.

All investments involve risk and the past performance of a security or financial product does not guarantee future results or returns. Keep in mind that while diversification may help spread risk it does not assure a profit, or protect against loss, in a down market. There is always the potential of losing money when you invest in securities, or other financial products. Investors should consider their investment objectives and risks carefully before investing. The price of a given security may increase or decrease based on market conditions and customers may lose money, including their original investment. Past history is no indication of future performance and returns are not guaranteed.

See https://about.robinhood.com/legal for additional disclosures.

Default Watchlist Feature

Your watchlist may be pre-populated with sample symbols to demonstrate the functionality of the Robinhood application. Any symbols included in your pre-populated watchlist are based on popularity on Robinhood's platform, or coverage in the news when your account is created. You can always remove these symbols from your watchlist and add any others of your choosing. The inclusion of pre-populated symbols in your watchlist is not a recommendation or solicitation to buy or sell any security in your Robinhood Account.

"For You" Feature

Stocks provided in the "For You" list are based on your holdings and your investor profile (e.g., risk tolerance, investment objective, time horizon, liquidity needs). Given such information about all of our users with sufficiently large portfolios, a machine learning model predicts the probability that a user with your profile would add any given other stock to his or her portfolio. This is then compared to the probability that a typical Robinhood user would add that stock to his or her portfolio on the most recent trading day. The stocks displayed in the "For You" have the highest relative statistical likelihood of inclusion in the portfolio of a user with your profile versus a typical Robinhood user, as computed using a statistical analysis known as a z-score. The "For You" list is not a personal recommendation for any particular customer or an offer to buy, sell or hold any security. The "For You" list is generally updated several times daily, so customers should review and consider any recent market or company news before taking any action.

News Feature

The Robinhood website filters news from a variety of sources. News articles selected for display may depend on your portfolio and watchlist. Information presented is provided by third parties. Robinhood does not guarantee the accuracy, timeliness or completeness of any third-party information.

About Feature

Information provided in the "About" section of individual stock web page is collected from third-party sources. Robinhood does not guarantee the accuracy, timeliness or completeness of any third-party information.

"Price Paid on Robinhood" Feature

The "Price Paid on Robinhood" feature depicts the distribution of cost basis for the specific security across all open positions for that security at Robinhood. The 52 Week Low and 52 Week High are computed using information provided from third-party sources. Robinhood does not guarantee the accuracy, timeliness or completeness of any third-party information.

"Analyst Ratings" Feature

Information displayed under the "Analyst Ratings" feature is collected from third-party sources. Robinhood does not guarantee the accuracy, timeliness or completeness of any third-party information. The percentage of Buy, Hold, and Sell are provided for informational purposes only and are not intended to serve as a recommendation to a customer to buy or sell any security in their self-directed Robinhood account, or any other account.

Information contained under the "Buy Rating" and "Sell Rating" headings: (1) is proprietary to Morningstar Research Services LLC, Morningstar, Inc. and/or their content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar Research Services, Morningstar nor their content providers are responsible for any damages or losses arising from any use of this information. Access to or use of the information contained herein does not establish an advisory or fiduciary relationship with Morningstar Research Services, Morningstar, Inc. or their content providers. Past performance is no guarantee of future results. ©2017 Morningstar. All Rights Reserved. Robinhood does not guarantee the accuracy, timeliness or completeness of any third-party information.

"People Also Bought" Feature

Stocks listed under the "People Also Bought" feature are based on the holdings of other Robinhood users also holding the specific security. Given portfolio information about all of our users with sufficiently large portfolios, a statistical model calculates the probability that a user holding the specific security would also hold any given other stock in his or her portfolio. This is then compared to the probability that a typical Robinhood user would hold that stock in his or her portfolio. The stocks

c16fb7df48b040912e4988a7bcaab6ad31263a68

displayed in the "People Also Bought" list have the highest relative statistical likelihood of inclusion in the portfolio of a user holding the specific security versus a typical Robinhood user, as computed using a statistical analysis known as a z-score.

The stocks listed under the "People Also Bought" feature are not personal recommendations for any particular customer or an offer to buy, sell or hold any security. The data is generally updated daily, so customers should review and consider any recent market or company news before taking any action.
